

LIST OF CORRECTIONS

This publication has been prepared primarily by assembling and binding the maps and tabular materials originally issued in the separate PC(1)-A, B, C, and D final reports for the State. This plan was adopted in order to conserve public funds. The corrections listed below represent changes which would ordinarily have been made if this publication had been prepared by reprinting these maps and tabular materials. Those items with an asterisk (*) consist of

errors which affect not only the specific figure(s) mentioned but also affect other data in this publication. Among the other data which might be involved are the statistics for a larger area of which the particular area is part and the statistics by such classifications as urban-rural residence and size of place. The user can, of course, carry through these types of changes if he thinks them worthwhile.

Kalawao County (map location G-1): Kalawao division not shown (coextensive with Kalawao County).
Hawaii County (D-1): Kailua-Keaouhou (U) shown as Kailua-Keaouhou.

The 1940 population of Honolulu should carry the following footnote: "Excludes 1940 population (32) of Palmyra Island, formerly part of Honolulu. No population was reported in 1950 for the Island which was detached from the Territory when Hawaii became a State." Add the following footnote to the 1890 population total for Honolulu: "Censuses prior to 1900 taken under the direction of the Hawaiian Government."

Change 1950 population of Maui County from 48,519 to 48,173; rural population from 24,823 to 24,483; percent increase, 1950 to 1960, total population from -12.2 to -11.6, and rural, from 0.3 to 1.7.

Change 1960 population of Kailua-Keaouhou (U), shown as Kailua-Keaouhou (U), from 466 to 499. Change 1950 population of Waimea (U), Hawaii County, from 341 to 560, and the 1940 population from 414 to 445.

Pages 26, 31, and 38, tables 19, 21, and 28*
The numbers of inmates in table 21 shown for Honolulu city, Honolulu Urbanized Area, and Honolulu Standard Metropolitan Statistical Area, and in table 28 for Honolulu County, exclude approximately 120 persons who were misclassified as "other" persons in group quarters. This misclassification also affects the corresponding numbers for the State, shown in table 19.

Page 105, table C-2
The nonresponse rates for "Birth date, decade unknown" erroneously exclude nonresponses for group quarters members other than inmates.

Pages 119 and 120, table 99
Add footnote symbol 3 to the line for "Other West Indies."

Pages 121 and 122, table 100
These two pages were reprinted prior to binding of this book, in order to correct the figures in the four columns under "Different State by region." The figures shown here, therefore, supersede those originally published in Final Report PC(1)-130.

Pages 188 and 194, tables 120 and 121
Under "Laborers (n.e.c.)," the 15 lines from "Machinery, exc. electrical" through "Miscellaneous manufacturing industries" are indented two spaces too many.

Pages 195-216, tables 122 to 124
On each page showing Male, Operatives and kindred workers, the line reading "Furnacemen, smeltermen, and heaters" should be changed to "Furnacemen, smeltermen, and pourers."

Pages 195-228, tables 122 to 125
On each page showing Male, Craftsmen, foremen, and kindred workers, the line reading "Cranemen, hoistmen, and const. mach. operators" should be changed to "Cranemen, derrickmen, and hoistmen."

During the tabulation of statistics on place of work, it was discovered that some enumerators working in unincorporated areas near large cities had failed to identify correctly these large cities as places of work (see text, p. XXXVII). In the tabulations for chapter C, a corrective mechanical edit was introduced that allocated such cases to the largest city in the same county. In some few instances, notably Armed Forces installations, the initial entries were correct, and appreciable numbers of persons living in the ring were incorrectly assigned the central city as a place of work by the edit.

Since many of these persons had reported themselves as working at home, the previous edit was expanded in the tabulations for chapter D to assign these latter cases, as well as other inconsistencies of the same type, to means of transportation not reported. The amount then by which the chapter D figure exceeds the chapter C figure for the "Not reported" category in means of transportation for persons living in the SMSA ring provides a rough measure of the amount of the error involved; that is, the amount by which the total figure in column 8 should be decreased and the total figure in column 9 increased. This number was 18,130 for the Honolulu SMSA. Detailed information on the characteristics of the misclassified persons is not available, but most of them were young men in the Armed Forces.

Pages 250 and 251, table 134
The median income should not have been published for the following groups, as the bases on which the computations were made were each less than 200:

Rural farm, male:	14 to 19 years
	20 to 24 years
	75 years and over
Rural farm, female:	14 to 19 years
	45 to 54 years

Page 270, table D-1
The following explanatory footnote should be keyed to the line for "Not reported" in the section on "Relationship":

Limited to persons who were allocated to the categories "Wife of head," "Other relative of head," or "Nonrelative of head."

Page 270, table D-1
The category "Not reported in decade or year" under "Age" erroneously excludes non-responses on decade of birth for group quarters members other than inmates.
